# WS Duo Stand

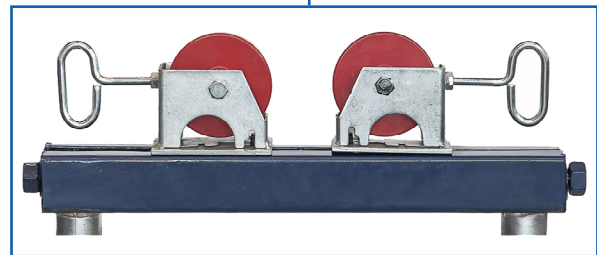

## Features

- **2400 kg** load capacity
- Folding legs for ease of transport and storage
- Self centering roller adjustment from either sides
- Height adjustable **74-109 cm**
- Pipe diameter capacity **½-48"**
- Height leveling from either side of the stand
- Wheels trued for true pipe rotation
- Bronze bearing to eliminate arcing
- Brake to lock loads for layout or fit-up
- Uses Quick Change Housings
- CE rated

*Ball heads available*

*Roller heads available*

The WS stands with Quick-change style heads are designed for large diameter pipe rotation and feeding. With lock brakes on the wheels to secure the load or marking layout or fit-up. Now supplied with folding legs as standard for ease of use and transport.

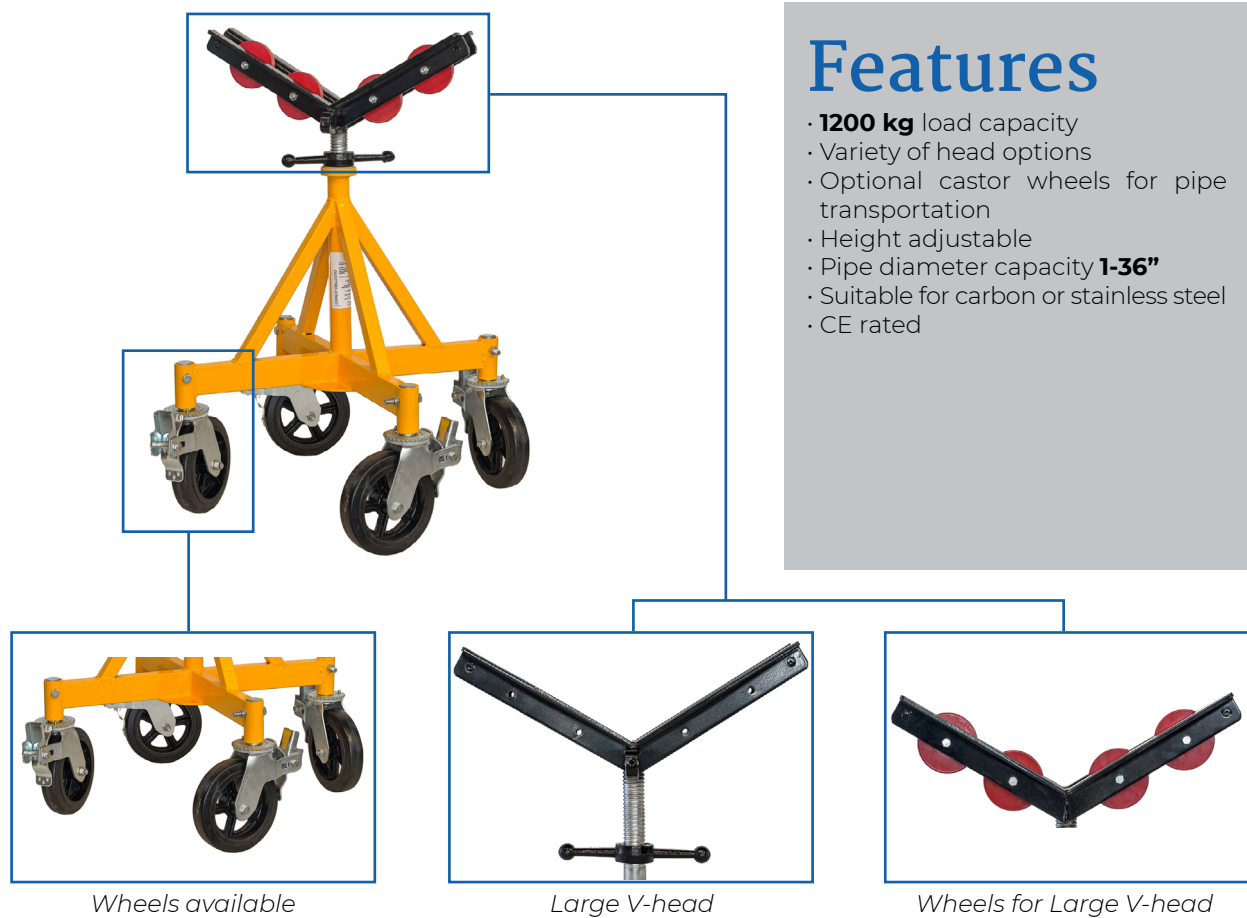

The Quick Change style roller housings increase the versatility of the duo stand. Roller housings can be changed in a matter of seconds, without tools, to adapt to almost any applications. Roller wheels are available in either steel, stainless steel or nylon. Ball transfer heads suitable for carbon or stainless steel pipes are also available.

# WS Quattro Stand

The Quattro Heavy Duty Pipe Stand is the ideal solution for heavy duty pipe handling, in the workshop or for site applications. The large V-head, heavy duty base and variety of head options make the Quattro the most durable and versatile pipe stand on the market. The Quattro stand can be used as a simple jack stand, supplied as standard with levelling pads to accommodate uneven working surfaces. Weight load tested to 1200 kg per stand.

The Quattro stands can also be supplied with lockable castor wheels so pipes of up to 36" diameter and any length can be moved around a workshop or site, without using a crane or forklift.
